SUMMARY

1+ yearsofexperience as a Mobile Application Developer building high-performance, scalable mobile applications using Flutter and Dart. Strong in clean architecture, state management, CI/CD automation, secure API integrations, and performance optimization. Proven track record delivering crash-free, production-grade apps with fast load times and efficient deployments. Experienced in collaborating with cross-functional teams, building real-time systems, and publishing apps to Google Play. Based in Dubai and open to full-time opportunities.

TECHNICAL SKILLS

Languages& Frameworks: Dart, Flutter
State Management: GetX, Provider, Riverpod, Bloc
Architecture: Clean Architecture, MVC
Database & APIs: Firestore, Firebase Authentication, REST APIs, Swagger, Postman
Integrations: Firebase, Branch.io, Payment Gateways
CI/CD & Deployment: Google Play Console
Tools: Git, GitHub

WORK EXPERIENCE

Junior Flutter Developer

Corevant Platforms Pvt. Ltd. – Thodupuzha, Kerala, Aug 2025 – Mar 2026

- Developed and published Vitara Gold, a Gold SIP investment mobile application on Google Play Store.
- Integrated secure REST APIs with encrypted request and response handling for financial transactions.
- Implemented PhonePe payment gateway for seamless payment processing.
- Managed development and production environments while optimizing app performance.
- Integrated Push Notification, AppsFlyer, Branch.io, and deep-linking for enhanced tracking and user engagement.
- Maintained clean, modular code architecture (MVC, Clean Architecture), reducing code duplication and improving development speed.
- Deployed apps to Play Store and App Store with 100% approval on every release.

Flutter Developer Intern

Rootments Enterprises LLP – Edapally, Ernakulam, Dec 2024 – April 2025

- Developed a wedding dress rental management system with inventory and booking modules.
- Implemented tag-number search functionality to verify dress availability by date.
- Integrated Flutter frontend with MERN backend using REST APIs.
- Collaborated with UI/UX designers to improve application usability and performance.

PROJECTS

Service Booking Application

- Developed a role-based service booking platform with Admin, User, and Worker dashboards.
- Implemented Firebase Authentication and Firestore for secure user management.
- Migrated image storage to Cloudinary for scalable media management.
